Item #7

May 20, 2026

TO: TRANSPORTATION TECHNICAL ADVISORY COMMITTEE (TTAC)
FROM: AMANDA FAGAN, DIRECTOR OF PLANNING & SUSTAINABILITY
SUBJECT: SCAG REGIONAL ITS INFRASTRUCTURE

RECOMMENDATION:

- *Receive and file a presentation from Southern California Regional Intelligent Transportation System (ITS) Architecture.*

BACKGROUND

The SCAG Southern California Regional Intelligent Transportation System (ITS) Architecture provides a framework for ITS planning that promotes interoperability and communication across jurisdictional boundaries. Projects developed under a regional framework extend the usefulness of any single project by making information easily accessible for operators and users of the system. The Southern California Regional ITS Architecture is intended to provide a resource for project sponsors and transportation providers that coordinates cross-county planning efforts in the SCAG region and facilitates project development (planning, design, implementation, etc.). Eligibility for Federal transportation funding for both highway and transit projects that include regional ITS elements are required to be consistent with the Regional ITS architecture pursuant to 23 CFR 940.9 and 940.11 and must comply with system engineering requirements and applicable Federal standards adopted for ITS implementation.

Staff from SCAG will share an update on the Southern California Regional ITS Architecture. Additional information is also available online at:

<https://scag.ca.gov/intelligent-transportation-system>.
