

Camarillo Station Americans with Disabilities Act (ADA) Improvements Project

Frequently Asked Questions

1. What is the Camarillo station ADA Improvements Project?

The Camarillo Station ADA Improvements Project is a construction project being implemented by VCTC to improve accessibility at the Camarillo Transit Station and bring the facility into compliance with applicable Americans with Disabilities Act (ADA) requirements. Improvements include upgrades to pedestrian pathways, curb ramps, platforms, accessible parking areas, signage, and other station features

2. Why is VCTC upgrading Camarillo Station?

The station was determined to have accessibility deficiencies, including inaccessible pedestrian routes, slope-related issues, missing detectable warning surfaces, and signage deficiencies. VCTC is carrying out the improvements to address these conditions and provide a more accessible station for all users.

3. When will construction begin?

Construction is anticipated to begin on September 8, 2026. Construction activities will occur in phases to minimize impacts and maintain station operations whenever feasible.

4. Will the station remain open during construction?

Yes. The station is expected to remain operational during construction. Work has been planned to maintain safe passenger access and minimize disruptions to rail and bus services whenever possible.

5. Will bus/train service be affected during construction?

Train service is not expected to be suspended as part of this project. Construction activities will be coordinated with railroad operators and agencies to maintain safe operations throughout the project. VCTC Intercity, Camarillo Area Transit (CAT) trolley, and Santa Barbara Airbus service are expected to continue operating during

construction. Temporary changes to boarding locations, pedestrian routes, or station access may occur as work progresses. Advance notice will be provided when possible.

6. What improvements are being made?

Project improvements include:

- Accessible pathways of travel
- Curb ramp upgrades
- Detectable warning surfaces
- Platform and boarding area improvements
- Accessible parking improvements
- Crosswalk enhancements
- ADA-compliant signage
- Related drainage, electrical, and infrastructure improvements

7. Will parking be available during construction?

Some parking areas may be temporarily closed or modified depending on the phase of construction. Temporary parking and access adjustments will be communicated through project notices and signage.

8. How will pedestrians access the station?

Temporary pedestrian routes will be established as necessary to maintain access to the station. Construction signage and wayfinding will be provided to direct passengers safely through the work areas.

9. Will accessible routes remain available during construction?

Yes. Maintaining accessibility during construction is a project priority. Temporary accessible routes will be provided whenever existing accessible paths are impacted by construction activities.

10. Why are there multiple construction phases?

The project is being completed in phases so that portions of the station can remain open while improvements are made. Phasing also helps maintain safe access for passengers and coordinate work around ongoing rail operations.

11. Will construction be noisy?

Construction activities may generate temporary noise, dust, and equipment activity. The contractor will implement measures to minimize impacts to passengers, nearby businesses, and surrounding properties.

12. How long will construction last?

It is anticipated that construction will begin in Summer/Fall 2026 and will be completed by Spring/Summer 2027.

13. How will I know about changes during construction?

Project updates will be communicated through:

- Posted notices at the station
- VCTC website updates
- Coordination with transit operators
- Passenger information signage
- Social media and outreach communications, as appropriate

14. Who can I contact for questions?

Questions regarding the project may be directed to:

Ventura County Transportation Commission (VCTC)
